

Made Yurista Indani Sukma

Bali, Indonesia | indanisukma@gmail.com | (+62) 83114688989 | www.linkedin.com/in/yuristaindani

PROFILE

I am Yurista Indani, an Information Technology graduate from Udayana University and Machine Learning Cohort at Bangkit Academy with a strong focus on Data Science and Artificial Intelligence. Experienced in developing end-to-end machine learning solutions, particularly in computer vision and deep learning, including model optimization and mobile deployment. Actively engaged in organizational and committee roles, cultivating strong leadership, communication, teamwork, and time management skills. Passionate about leveraging AI to create impactful, data-driven applications.

EDUCATION

Udayana University (2022 – 2026)

Bachelor of Information Technology | Cumulative GPA: 3.88/4.00

SMAN 8 Denpasar (2019 – 2022)

Class of Science | Passing Grade: 86.31

TECHNICAL PROJECTS

Rupa Tipat: Ketupat Bali Classification App

Deep Learning Model & Android Application Development

Sep 2025 – May 2026

- Built and fine-tuned a hybrid deep learning model to classify 13 distinct types of Balinese Ketupat, utilizing a pre-trained EfficientNetV2 backbone integrated with a custom Multi-Head Self-Attention (MHSA) classification head.
- Implemented robust image preprocessing pipelines, executing specific resizing and normalization steps using OpenCV to optimize dataset quality prior to training.
- Executed the model conversion workflow from .h5 format to TensorFlow Lite (.tflite), ensuring a lightweight and highly optimized model for edge-device deployment.
- Developed the native Android application using Kotlin, seamlessly integrating the on-device TFLite model alongside the Gemini 2.5 Flash API to generate dynamic, cultural descriptions for the identified artifacts.
- [View Project] [Rupa Tipat](#)

ChatBot Budaya Bali

Retrieval-Augmented Generation (RAG)

Mar 2025 – Jul 2025

- Engineered an automated web scraping pipeline to extract and compile a comprehensive text dataset focused on Balinese cultural heritage.
- Constructed an efficient vector database using FAISS (Facebook AI Similarity Search) to process and store document embeddings, enabling rapid and highly accurate similarity searches.
- Designed a robust Retrieval-Augmented Generation (RAG) architecture to effectively fetch contextually relevant cultural information from the vector store based on user queries.
- Integrated a GPT-based Large Language Model (LLM) to synthesize the retrieved database context and generate accurate, conversational, and culturally aware responses.
- [View Project] [ChatBot Budaya Bali](#)

AI Powered Image Editor Web Application

Computer Vision & AI Developer

Sep 2025 – Dec 2025

- Engineered a suite of AI-driven image editing features, including a photo-to-sketch converter and a selfie cartoonizer, utilizing MTCNN for accurate face detection and AnimeGanV2 for high-quality stylization.
- Implemented a "Ghibli Style" transformation tool by integrating a Stable Diffusion Image-to-Image pipeline with a fine-tuned Ghibli-Diffusion Model to apply artistic styles to user photos.

- Developed a generative AI Background Maker that automatically extracts the main subject using U²-Net (rembg) and generates customized new backgrounds based on user text prompts via a text-to-image model.
- Built a dynamic Background Changer feature leveraging U²-Net (rembg) for precise foreground segmentation, allowing users to seamlessly replace original backgrounds with their own uploaded images.

EXPERIENCE

Bangkit Academy Batch 2 2024

Machine Learning Graduate

Sep 2024 – Jan 2025

- Graduated from a rigorous, industry-led Machine Learning learning path, mastering advanced concepts including CNNs, NLP, GANs, Time Series Prediction, and TensorFlow Deployment through Google and Coursera specializations.
- Honed practical technical skills by building end-to-end ML pipelines, utilizing OpenCV for robust image preprocessing (resizing and normalization) alongside TensorFlow for model training and evaluation.
- Collaborated within a multidisciplinary capstone team (Machine Learning, Cloud Computing, and Mobile Development) to engineer Spotlyze, an AI-driven Android application designed to detect skin types and conditions.
- Engineered the core computer vision feature for Spotlyze by fine-tuning a pre-trained VGG19 backbone with a custom classification head, successfully achieving 94.69% accuracy in diagnosing skin conditions.

ORGANIZATION EXPERIENCES

Himpunan Mahasiswa Teknologi Informasi

Treasurer

2024 – 2025

- Recorded all financial income and expenses for Himpunan Mahasiswa Teknologi Informasi (HMTI).
- Monitored the finances of internal activities and programs within HMTI.
- Collaborated with all heads of departments and divisions regarding necessary expenditures.
- Worked closely with the Activity Treasurer on event budget management, ensuring financial efficiency and transparency.
- Prepared monthly and annual financial reports for the HMTI management board.
- Ensured all financial transactions were properly documented and compliant with established procedures.

Himpunan Mahasiswa Teknologi Informasi

Staff of External Public Relation

Jan 2023 – Dec 2023

- Spearheaded public relations efforts to convey information about Program Studi Teknologi Informasi to the wider community.
- Organized and conducted outreach campaigns across multiple schools to boost the visibility of Program Studi Teknologi Informasi.
- Acted as the official representative and liaison, bridging communications between internal students and external parties.
- Managed end-to-end coordination for external events (seminars, workshops, and conferences), ensuring successful collaboration with external partners.

VOLUNTEER EXPERIENCES

Techno Futsal Tournament 2024

Member of Event Division

Jan 2024 – Mar 2024

- Build an interesting concept of the events and plan the details, including event drafts and rundowns.
- Served as the MC for the opening and closing ceremonies of the tournament, ensuring a lively and engaging atmosphere.

Bakti Sosial Teknologi Informasi 2023 (Information Technology Student Charity Activities)

Treasurer

Jun 2023 – Oct 2023

- Recording all financial income and expenses in the Information Technology Student Charity Activities.
- Overseeing finances during activities.
- Collaborating with committee coordinators regarding each committee's expenses.
- Compiling weekly financial reports to be presented to the Treasurer of the Information Technology Student Association.
- Ensuring all financial transactions are well-documented and in accordance with applicable procedures.

SPORTI 2023 (Information Technology Student Sports Competition)

Event Division Coordinator

Jan 2023 – May 2023

- Conceptualized an innovative event theme that introduced a fresh and engaging atmosphere for attendees.
- Designed and managed well-structured rundowns for both opening and closing ceremonies.
- Collaborated with cross-functional divisions to ensure seamless alignment and execution of the event lineup.
- Delegated tasks strategically to division members based on their individual strengths and capabilities
- Directed and supervised the event division team, ensuring smooth operations throughout the entire event

HONORS AND AWARDS

2nd Place in Innovation Competition 2026

Badung Festival Inovasi 2026

2nd Best Presenter 2023

Taksaka National Competition 2023

KEY SKILLS AND COMPETENCIES

Skillsets – Public Speaking, Problem-Solving, Project Management, Leadership, Teamwork, Creative Thinking.

Toolsets – Python (Machine Learning, Deep Learning, TensorFlow, PyTorch, Scikit-learn, Data Processing & Model Deployment), React JS, SQL, Basic Java (OOP Fundamentals), Web Development (HTML, CSS, PHP).

Languages – Indonesian (Native), English (Intermediate).
